NOTIFICATION OF TRANSMITTAL
OF COPIES OF TRANSLATION
OF THE INTERNATIONAL PRELIMINARY
EXAMINATION REPORT

(PCT Rule 72.2)

To:

ZF FRIEDRICHSHAFEN AG
88038 Friedrichshafen
ALLEMAGNE

TS Eingang
1 0. Jan. 2005

Date of mailing (day/month/year)
29 December 2004 (29.12.2004)

Applicant's or agent's file reference 8331 WO Z RSF-ALG

IMPORTANT NOTIFICATION

International application No. PCT/EP2003/007242

International filing date (day/month/year) 07 July 2003 (07.07.2003)

Applicant

ZF FRIEDRICHSHAFEN AG et al

1. Transmittal of the translation to the applicant.

The International Bureau transmits herewith a copy of the English translation made by the International Bureau of the international preliminary examination report established by the International Preliminary Examining Authority.

2. Transmittal of the copy of the translation to the elected Offices.

The International Bureau notifies the applicant that copies of that translation have been transmitted to the following elected Offices requiring such translation:

None

The following elected Offices, having waived the requirement for such a transmittal at this time, will receive copies of that translation from the International Bureau only upon their request:

EP, US

3. Reminder regarding translation into (one of) the official language(s) of the elected Office(s).

The applicant is reminded that, where a translation of the international application must be furnished to an elected Office, that translation must contain a translation of any annexes to the international preliminary examination report.

It is the applicant's responsibility to prepare and furnish such translation directly to each elected Office concerned (Rule 74.1). See Volume II of the PCT Applicant's Guide for further details.

2. Citations and explanations

1. The following documents are cited in the present report. The same numbering will be used throughout the procedure:

D1 DE-A-100 23 441

D2 DE-A-100 63 422.

The following documents are specified in the present report for the first time:

D3 EP-A-0 571 882

D4 EP-A-0 890 619.

- 2. Claims 1-5 do not appear to be novel within the meaning of PCT Article 33(2):
- 2.1 The claimed use of waxes produced using a metallocene catalyst in powder paints is known from D2 (page 7, line 64 to page 9, line 35). The claimed properties [dropping point 80 to 165 °C, density 0.87 to 1.03 g/cm³, viscosity 10 to 100 000 mPa.s (see the example of D2) and particle size (for example in D2, page 3, lines 10 to 15 and page 2, lines 10 to 14)] and the additives are also mentioned in D2.

It is generally known that metallocene waxes have a narrow molecular weight distribution. For example, D2 refers, in connection with the production of the waxes used therein,

INTERNATIONAL PRELIMINARY EXAMINATION REPORT

Intermonal application No.
PCT/EP 03/03518

to D3, where a preferred molecular weight distribution of those waxes of 2 to 4 is mentioned on page 10. The waxes in D4 also have molecular weight distributions of less than 3 (see table 1).

A person skilled in the art can therefore take the teaching of the current claims directly from D2. The current claims 1-5 are therefore not novel in relation to D2.

- 3. Similarly D1 describes (paragraphs [0035] to [0038]) the use of such waxes in paints. The properties are disclosed in paragraph [0012] and here, too, reference is made to D3 in connection with the production (page 3, line 30), from which the molecular weight distribution is also known to a person skilled in the art.
- 3. The current claims 1-5 are not inventive within the meaning of PCT Article 33(3).
- 3.1 Since claims 1-5 are previously described in D1 and D2, they must also be considered to be obvious.
